

From E 171st street follow the Bixhoma Lake Road uphill for 0.55 miles.

There is a one story house with a rail fence near the pines. To your left, follow a road which runs through a black iron gate and beside the house. Punch 028 on the keypad to the left of the gate.

Follow this road 0.15 miles. It curves around and runs through a draw. It is very hard to see oncoming traffic, and the road is narrow. Drive slow and be alert. You will come to a road branching right, but continue to drive straight ahead (gravel/muddy road) onto State property. You should see an "OKLAHOMA GEOLOGICAL SURVEY" sign ahead and to the right of the road.
